Sampling techniques for forest resource inventory.

Designed to aid readers in gathering the most reliable quantitative information on forests for the least cost. Thoroughly explains the interrelationships between sampling strategies; discusses forestry techniques of efficient tactics; examines new developments in statistics having immediate applications in forestry and describes related developments that should have relevance in the future.

Sampling Methods for Multiresource Forest Inventory | Wiley

Sampling methods are characterized into two distinct approaches: probability sampling and non-probability sampling. For example, while collecting feedback about a sensitive topic like AIDS, respondents aren't forthcoming with information. When estimation is the only issue, systematic sampling is always to be preferred for forest inventory.
