Superior

The Return of Race Science *Beacon Press*

2019 Best-Of Lists: 10 Best Science Books of the Year (Smithsonian Magazine) · Best Science Books of the Year (NPR's Science Friday) · Best Science and Technology Books from 2019" (Library Journal) An astute and timely examination of the re-emergence of scientific research into racial differences. Superior tells the disturbing story of the persistent thread of belief in biological racial differences in the world of science. After the horrors of the Nazi regime in World War II, the mainstream scientific world turned its back on eugenics and the study of racial difference. But a worldwide network of intellectual racists and segregationists quietly founded journals and funded research, providing the kind of shoddy studies that were ultimately cited in Richard Herrnstein and Charles Murray's 1994 title *The Bell Curve*, which purported to show differences in intelligence among races. If the vast majority of scientists and scholars disavowed these ideas and considered race a social construct, it was an idea that still managed to somehow survive in the way scientists thought about human variation and genetics. Dissecting the statements and work of contemporary scientists studying human biodiversity, most of whom claim to be just following the data, Angela Saini shows us how, again and again, even mainstream scientists cling to the idea that race is biologically real. As our understanding of complex traits like intelligence, and the effects of environmental and cultural influences on human beings, from the molecular level on up, grows, the hope of finding simple genetic differences

between "races"—to explain differing rates of disease, to explain poverty or test scores, or to justify cultural assumptions—stubbornly persists. At a time when racialized nationalisms are a resurgent threat throughout the world, Superior is a rigorous, much-needed examination of the insidious and destructive nature of race science—and a powerful reminder that, biologically, we are all far more alike than different.

Give and Take

Why Helping Others Drives Our Success *Penguin*

A groundbreaking look at why our interactions with others hold the key to success, from the bestselling author of *Think Again* and *Originals* For generations, we have focused on the individual drivers of success: passion, hard work, talent, and luck. But in today's dramatically reconfigured world, success is increasingly dependent on how we interact with others. In *Give and Take*, Adam Grant, an award-winning researcher and Wharton's highest-rated professor, examines the surprising forces that shape why some people rise to the top of the success ladder while others sink to the bottom. Praised by social scientists, business theorists, and corporate leaders, *Give and Take* opens up an approach to work, interactions, and productivity that is nothing short of revolutionary.

Changes of Mind

A Holonomic Theory of the Evolution of Consciousness *SUNY Press*

An original theory of the development of consciousness that brings together research from neurology, new-paradigm studies, psychology, and mysticism.

Quantum Leadership

New Consciousness in Business

Stanford University Press

In this new book, Frederick Chavalit Tsao and Chris Laszlo argue that current approaches to leadership fail to produce positive outcomes for either businesses or the communities they serve. Employee disengagement and customer fickleness remain high, resulting in a lack of creativity and collaboration at all levels of entrepreneurial activity. Investor demand for Environmental, Social, and Governance (ESG) continues to be poorly integrated into profit strategies. Drawing on extensive research, this book shows how changing a person's consciousness is the most powerful lever for unlocking his or her leadership potential to create wealth and serve humankind. A wide range of practices of connectedness provide the keys. The journey to higher consciousness changes people at a deep intuitive level, combining embodied experience with analytic-cognitive skill development. Tsao and Laszlo show how leaders who pursue this journey are more likely to flourish with significant benefits to both business and society. These include greater creativity and collaboration along with an increased capability to inspire people and produce lasting change. Readers will come away with a deep understanding of quantum leadership and the day-to-day practices that can help them achieve greater effectiveness and wellbeing at work.

The Will to Change

Men, Masculinity, and Love *Simon and Schuster*

Everyone needs to love and be loved—even men. But to know love, men must be able to look at the ways that patriarchal culture keeps them from knowing themselves, from being in touch with their feelings, from loving. In *The Will to Change*, bell hooks gets to the heart of the matter and shows men how to express the emotions that are a fundamental part of who they are—whatever their age, marital status, ethnicity, or sexual orientation. But toxic masculinity punishes those fundamental emotions, and it's so deeply ingrained in our society that it's hard for men to not comply—but hooks wants to help change that. With trademark candor and fierce intelligence, hooks addresses the most common concerns of men, such as fear of intimacy and loss of their patriarchal place in society, in new and challenging ways. She believes men can find the way to spiritual unity by getting back in touch

with the emotionally open part of themselves—and lay claim to the rich and rewarding inner lives that have historically been the exclusive province of women. A brave and astonishing work, *The Will to Change* is designed to help men reclaim the best part of themselves.

A Radical Approach for HR & Managers (That Leads to Motivated Employees)

Corporate cultures, global mindsets, and employee priorities are changing, which means management and human resources departments must also evolve. To ensure teams are well crafted, motivated, and successful, managers and HR professionals must step outside their comfort zone and adapt to younger, newer ways of thinking—they must become Agile. In *Agile People*, management consultant Pia-Maria Thoren outlines how managers, human resources professionals, company decision-makers, and employees can adopt the flexible, fluid, customer-focused mindset of modern tech companies to inspire their workers and strengthen their organizations. This essential handbook explains both the theories and practical applications behind the Agile framework, showing how companies can do the following:

- Create a structure and culture for an organization to meet future challenges
- Give management and HR the changed mindset and the tools to facilitate employee drive and performance
- Empower employees to become motivated stakeholders
- Adopt hiring practices that value attitude, behavior, and competence
- Create a passionate, loyal, and accomplished workforce

No matter the size of a company, it can

benefit from an Agile mindset and launch into a future filled with successful leadership and motivated employees.

Has China Devised a Superior Path to Wealth Creation? The Role of Secular Values *Cambridge Scholars Publishing*

The rise of China will profoundly change the world, and the rest of us now have a chance to understand how and why this is happening, or continue to moralise about this “disaster”, thought to harm our way of life. What is especially galling is that the Chinese appear better able to create wealth and value than the West. Even in the midst of political denunciations, more and more businesses are profitably engaging China. We have to face the fact that China excels at what we are supposed to admire, the peaceful creation of wealth. It even withstands the current pandemic several hundred times more successfully than we have. The answers to China’s success lie not in “communism” but in Chinese civilization and culture which is 22 centuries old and extends to most of East Asia, and has traded peacefully since Roman times. This is a book about measured business cultures, East and West, and explains, using largely Western scholarship, why China is winning and will continue to do so unless and until we wake up.

Halfway Up The Mountain

The Error of Premature Claims to Enlightenment *SCB Distributors*

Caplan (*TO TOUCH IS TO LIVE*) asserts that “the reality of the present condition of contemporary spirituality in the West is one of grave distortion, confusion, fraud, and a fundamental lack of education.” She claims that, as positive

as the tremendous rise in spirituality is, there is not any context for determining whether any particular teaching, or teacher, is truly enlightening. Caplan compiles interviews with such noted spiritual masters as Joan Halifax, Llewellyn Vaughan-Lee and Rabbi Zalman Schachter-Shalomi on the nature of enlightenment. In the first section, Caplan examines the motivations people have for seeking enlightenment and contends that very often they seek this state as a means of gratifying the ego. This "presumption of enlightenment," she says, often afflicts teachers masquerading as spiritual leaders. These teachers sometimes look down on their students and gloat over how far they have come and how far the students have to go. A second section focuses on "The Dangers of Mystical Experience," in which Caplan claims that many seekers mistake the mystical experience itself for enlightenment; she and the teachers she interviews all assert that enlightenment always involves gaining some knowledge about self and others. The third section, "Corruption and Consequence," focuses on the nature of power and corruption; the fourth section, "Navigating the Mine Field: Preventing Dangers on the Path," provides a survey of the ways in which practitioners can avoid the "pitfalls of false enlightenment." A final section, "Disillusionment, Humility and the Beginning of Spiritual Life," concludes that "the Real spiritual life [is] the life of total annihilation and the return to just what is." Caplan's illuminating book calls into question the motives of the spiritual snake handlers of the modern age and urges seekers to pay the price of traveling the hard road to true enlightenment.

Achilles in Vietnam

Combat Trauma and the Undoing of Character *Simon and Schuster*

An original and groundbreaking book that examines the psychological devastation of war by comparing the soldiers of Homer's Iliad with Vietnam veterans suffering from post-traumatic stress disorder. In this moving, dazzlingly creative book, Dr. Shay examines the psychological devastation of war by comparing the soldiers of Homer's Iliad with Vietnam veterans suffering from post-traumatic stress disorder. A classic of war literature that has as much relevance as ever in the wake of the wars in Iraq and Afghanistan, it is a "transcendent literary adventure" (The New York Times) and "clearly one of the most original and most important scholarly works to have emerged from the Vietnam War" (Tim O'Brien, author of *The Things They Carried*).

Seoul Man

A Memoir of Cars, Culture, Crisis, and Unexpected Hilarity Inside a Korean Corporate Titan *HarperCollins*

Recounting his three years in Korea, the highest-ranking non-Korean executive at Hyundai sheds light on a business culture very few Western journalists ever experience, in this revealing, moving, and hilarious memoir. When Frank Ahrens, a middle-aged bachelor and eighteen-year veteran at the Washington

Post, fell in love with a diplomat, his life changed dramatically. Following his new bride to her first appointment in Seoul, South Korea, Frank traded the newsroom for a corporate suite, becoming director of global communications at Hyundai Motors. In a land whose population is 97 percent Korean, he was one of fewer than ten non-Koreans at a company headquarters of thousands of employees. For the next three years, Frank traveled to auto shows and press conferences around the world, pitching Hyundai to former colleagues while trying to navigate cultural differences at home and at work. While his appreciation for absurdity enabled him to laugh his way through many awkward encounters, his job began to take a toll on his marriage and family. Eventually he became a vice president—the highest-ranking non-Korean at Hyundai headquarters. Filled with unique insights and told in his engaging, humorous voice, *Seoul Man* sheds light on a culture few Westerners know, and is a delightfully funny and heartwarming adventure for anyone who has ever felt like a fish out of water—all of us.

King, Warrior, Magician, Lover

Rediscovering the Archetypes of the Mature Masculine *Harper Collins*

The bestselling, widely heralded, Jungian introduction to the psychological foundation of a mature, authentic, and revitalized masculinity. Redefining age-old concepts of masculinity, Jungian analysts Robert Moore and Douglas Gillette make the argument that mature masculinity is not abusive or domineering, but generative, creative, and empowering of the self and others. Moore and Gillette clearly define the four mature male archetypes that stand out through myth and literature across history: the king (the energy of just and creative ordering), the warrior (the energy of aggressive but nonviolent action), the magician (the energy of initiation and transformation), and the lover (the energy that connects one to others and the world), as well as the four immature patterns that interfere with masculine potential (divine child, oedipal child, trickster and hero). *King, Warrior, Magician, Lover* is an exploratory journey that will help men and women reimagine

and deepen their understanding of the masculine psyche.

Passionate Enlightenment

Women in Tantric Buddhism *Princeton University Press*

The now-classic exploration of the role of women and the feminine in Buddhist Tantra. The crowning cultural achievement of medieval India, Tantric Buddhism is known in the West primarily for the sexual practices of its adherents, who strive to transform erotic passion into spiritual bliss. Historians of religion have long held that this attempted enlightenment was for men only, and that women in the movement were at best marginal and subordinated and at worst degraded and exploited. In *Passionate Enlightenment*, Miranda Shaw argues to the contrary and presents extensive evidence of the outspoken and independent female founders of the Tantric movement and their creative role in shaping its distinctive vision of gender relations and sacred sexuality. Including a new preface by the author, this Princeton Classics edition makes an essential work available for new audiences.
