Blowpipe analysis refers to the series of physical and chemical  
 tests made using the flame of a blowpipe. The blowpipe is a  
 metal tube about 25 cm long, tapering from a diameter of about  
 8 mm to an orifice of about 0.3 mm at the tip. It is usually made  
 of brass and bent at the right angle near the tip so the operator  
 can observe the flame ( Berzelius, 1845; Fletcher, 1894).
