Raised beds are a great way of growing a wide range of plants, and are particularly popular for growing fruit and vegetables. They are a good way of boosting drainage and can be used to introduce a different soil type to your garden. Raised beds are also a useful way to garden if you have restricted mobility, as they reduce the need to bend.

Liming garden soil reduces the acidity of the soil by increasing the pH level. Plants can't get the nutrients they need from soil that is too acid, and some materials such as aluminium can be at toxic levels in very acid soils. The pH level is a number that describes how acid or alkaline a soil is and from this it is calculated how much lime is needed to reduce acidity.
