Hard links and soft links in Linux explained | Enable Sysadmin

In cellular telecommunications, the terms handover or handoff refer to the process of transferring an ongoing call or data session from one channel connected to the core network to another channel.

Handover - Wikipedia

One of the key aspects of any cellular telecommunications systems is the handover from one cell or sector to another. Within 3G UMTS there are several forms of handover including hard handover, soft handover, a form of handover called softer handover and a handover from one radio access technology to another called inter-RAT handover.

3G UMTS Handover: Hard Soft Softer » Electronics Notes

Although softer handoff is the most reliable, it also uses more network capacity. The reason for this is that it is communicating with more than one sector or base station at any given instance. Soft handover is also less efficient than hard handover, but again more reliable as the connection is never lost.

Cellular Handover or Handoff » Electronics Notes

From Wikipedia, the free encyclopedia Soft handover or soft handoff refers to a feature used by the CDMA and W-CDMA standards, where a cell phone

is simultaneously connected to two or more cells (or cell sectors) during a call. If the sectors are from the same physical cell site (a sectorised site), it is referred to as softer handoff.

Soft handover - Wikipedia

Soft Handover is the same as softer handover but in this case the cells belong to more than one node B. In this case the combining is done in the RNC. It is possible to simultaneously have soft and softer handovers. Fig 3: Soft Handover with lur connection

UMTS Tutorial: Handover principle and concepts

It means, there will be a frequency switch from one frequency to another, and during the switching, there will be slightly communication cut, which is called as "hard handoff" (Hard Handoff) or "hard handover" (Hard Handover).

CDMA - Handoff - Tutorialspoint

Soft Handoff: Entails two connections to the cell phone from two different base stations. This ensures that no break ensues during the handoff. Naturally, it is more costly than a hard handoff. Are you missing out when it comes to Machine Learning?

What is Handoff? - Definition from Techopedia

In cellular telephone communication, soft handoff refers to the overlapping of repeater coverage zones, so that every cell phone set is always well within range of at least one repeater (also called a base station). In some cases, mobile sets transmit signals to, and receive signals from, more than one repeater at a time.
