Establishing Predominance of English for Specific Purposes within Adult English Language Teaching *Cambridge Scholars Publishing*

English for Specific Purposes (ESP) has accumulated substantial tradition in practice, research and theory. It is a common approach in English Language Teaching (ELT) among adults today, starting with high schools, then in academia, pre and in-service training, and life-long learning programs. The role of ESP in each of these is to facilitate work in today's inevitably international business and scientific environment. It provides language training based on the precise simulation of communicative situations found in the surroundings for which learners are preparing, including, for example, domain specific vocabulary, syntactic and morphological structures, text and speech content structuring, stylistics, intercultural competence.

At present, when English is present either as a foreign or second language, learning General English (GE) is to a large degree accomplished before learners start needing English for their jobs. In this way, ESP does not complete GE, but builds upon the foundations laid by it in learners' prior education. ESP is a channel of communication for the contemporary academia and economics. However, even so, these are still early days for ESP, as it does not yet have a recognised place within academia. Only very recently have we begun to witness the occasional but encouraging emergence of ESP academic courses and departments. This book thus explores practice and research conducted and under way in this field of ELT in order to assist its recognition as an autonomous academic discipline.

The Routledge Handbook of English Language Teaching *Routledge*

The Routledge Handbook of English Language Teaching is the definitive reference volume for postgraduate and advanced undergraduate students of Applied Linguistics, ELT/TESOL, and Language Teacher Education, and for ELT professionals engaged in in-service teacher development and/or undertaking academic study. Progressing from 'broader' contextual issues to a 'narrower' focus on classrooms and classroom discourse, the volume's inter-related themes focus on: ELT in the world: contexts and goals planning and organising ELT: curriculum, resources and settings methods and methodology: perspectives and practices second language learning and learners teaching language: knowledge, skills and pedagogy understanding the language classroom. The Handbook's 39 chapters are written by leading figures in ELT from around the world. Mindful of the diverse pedagogical, institutional and social contexts for ELT, they convincingly present the key issues, areas of debate and dispute, and likely future developments in ELT from an applied

linguistics perspective. Throughout the volume, readers are encouraged to develop their own thinking and practice in contextually appropriate ways, assisted by discussion questions and suggestions for further reading that accompany every chapter. English in the Disciplines

A Multidimensional Model for ESP Course Design *Routledge*

The context for the teaching and learning of English for specific disciplinary purposes is undergoing profound changes under the influence of economic globalization and new digital communication technologies. English in the Disciplines demonstrates how fundamental principles of ESP, to tailor language learning materials to the needs of specific groups of learners, can be adapted to new contexts of learning in the digital age. Based on sustained research into students' experiences in an ESP context in Hong Kong, this volume provides an empirically grounded and practical methodology to ESP learning and course design and features:

- mixed-method case studies;
- links between theory and practice, with plentiful examples of teaching materials and learning activities;
- recognition of the effect of new technologies and globalization on the practice of ESP, highlighting problems and providing practical solutions;
- a new pedagogical model for ESP course design, addressing multiple dimensions relevant to today's ESP learners including learner autonomy, genre, multimodality and digital literacies, plurilingual practices, and project-based learning and collaboration.

English in

the Disciplines provides key reading for anyone studying and researching this topic.

Present and Future Trends in TEFL *Universidad Almería*

The aim of this book is to develop a framework for describing the field as it currently exists together with well-established views. As far as possible the book describes rather than prescribes, to avoid taking up any single approach or theory regarding what constitutes the legitimate approach to TEFL research. Of course, the personal views of the authors will colour the account provided as it is impossible to separate description from interpretation. Thus, in a way, this book involves the theories, beliefs, knowledge, methods and practices of foreign language teachers and how these can enhance teacher education. This book is planned for pre-service or in-service teachers of a foreign language at primary, secondary or tertiary levels, although the criteria examined are useful to teachers of English as a foreign language, teacher trainers, or modern language teachers involved in teaching any language whether in Spain or overseas. Our main purpose is to help readers to help themselves. Accordingly, the reader is encouraged to be engaged in an examination of foreign language teaching and learning in hope of improving his/her practice and making language teaching more controllable, more interesting and more effective. The chapters are organized into four sections. In Section I, three chapters describe some perspectives in teacher education. In the first chapter, José M. Vez focuses on the hypothesis that the key to producing well-qualified EFL teachers is to greatly strengthen their professional learning across the continuum of a career in

the foreign language classroom. He emphasizes the fact that foreign-language teaching must become a learning profession in order to prompt greater learning among foreign language students and describes the innovative aspects of foreign language teacher education. In the second chapter, Sheena Davies provides an overview of language teacher education today, with particular reference to English language teaching, discusses some current issues associated with the field, and gives notice of her experience working with both native speaker and non-native speaker teachers of English from all over the world on a variety of in-service and pre-service courses and seminars. In chapter 3, we examine the perspectives on teacher thinking and teachers' beliefs in general, and about language learning in particular. .

Synergies of English for Specific Purposes and Language Learning Technologies *Cambridge Scholars Publishing*

Bilingualism and multilingualism both make a major contribution

in cross-cultural interaction, but, at the same time, improve various cognitive abilities, such as better attention and multitasking. Meaning in the world around us is represented by means of the language that is used for communication and knowledge exchange between intelligent individuals. The phenomena of human interaction and communication are recently experiencing unprecedented influence from digital

technologies. Language learning is part of the global revolution, meaning that language learning technologies are playing an increasingly important role in learning English for Specific Purposes. This volume addresses theoretical and practical aspects of learning, technology adoption and pedagogy in the context of English for Specific Purposes.
