Over the past thirty-five years, a substantial amount of theoretical and empirical scholarly research has been developed across the discipline domains of Transportation. This research has been synthesized into a systematic handbook that examines the scientific concepts, methods, and principles of this growing and evolving field. The Handbook of Transportation Science outlines the field of transportation as a scientific discipline that transcends transportation technology and methods. Whether by car, truck, airplane - or by a mode of transportation that has not yet been conceived - transportation obeys fundamental properties. The science of transportation defines these properties, and demonstrates how our knowledge of one mode of transportation can be used to explain the behavior of another. Transportation scientists are motivated by the desire to explain spatial interactions that result in movement of people or objects from place to place. Its methodologies draw from physics, operations research, probability and control theory.

Beyond Basic Statistics

Tips, Tricks, and Techniques Every Data Analyst Should Know *John Wiley & Sons*

Features basic statistical concepts as a tool for thinking critically, wading through large quantities of information, and answering practical, everyday questions Written in an engaging and inviting manner, *Beyond Basic Statistics: Tips, Tricks, and Techniques Every Data Analyst Should Know* presents the more subjective side of statistics—the art of data analytics. Each chapter explores a different question using fun, common sense examples that illustrate the concepts, methods, and applications of statistical techniques. Without going into the specifics of theorems, propositions, or formulas, the book effectively demonstrates statistics as a useful problem-solving tool. In addition, the author

demonstrates how statistics is a tool for thinking critically, wading through large volumes of information, and answering life's important questions. *Beyond Basic Statistics: Tips, Tricks, and Techniques Every Data Analyst Should Know* also features: Plentiful examples throughout aimed to strengthen readers' understanding of the statistical concepts and methods A step-by-step approach to elementary statistical topics such as sampling, hypothesis tests, outlier detection, normality tests, robust statistics, and multiple regression A case study in each chapter that illustrates the use of the presented techniques Highlights of well-known shortcomings that can lead to false conclusions An introduction to advanced techniques such as validation and bootstrapping Featuring examples that are engaging and non-application specific, the book appeals to a broad audience of students and professionals alike, specifically students of undergraduate statistics, managers, medical professionals, and anyone who has to make decisions based on raw data or compiled results.

Estadística descriptiva *Univ. Autònoma de Barcelona*

L'estadística descriptiva i exploratòria proporciona els elements més bàsics de resum de la informació, un objectiu fonamental en qualsevol àmbit del coneixement i un pas previ per a la inferència. Aquest text és bastant més que un compendi de resultats; es tracta d'un conjunt equilibrat i raonat d'instruments d'estadística descriptiva il·lustrats amb exemples, però també analitzats des d'un punt de vista teòric. Els continguts van des dels descriptius univariants i bivariants fins a les sèries temporals i els nombres índexs, sense entrar mai en procediments

d'inferència. Per seguir el manual no es necessita més bagatge matemàtic que la formació adquirida al batxillerat. Es tracta, doncs, d'un llibre molt apropiat per a l'estudi guiat o autònom de l'estadística descriptiva, tant en el nivell de grau com en el de postgrau, i els seus continguts són aplicables a qualsevol branca del coneixement que utilitzi l'estadística. Xavier Bardina Simorra i Mercè Farré Cervelló són professors titulars de l'àrea d'Estadística i Investigació Operativa del Departament de Matemàtiques de la UAB, amb una àmplia experiència docent. Aquest manual sorgeix de la configuració revisada dels apunts de l'assignatura d'Estadística Descriptiva de la titulació d'Estadística que tots dos han impartit. Els interessos de recerca dels autors s'han centrat en la probabilitat i els processos estocàstics.

Estadística: un curs introductor i per a estudiants de ciències socials i humanes *Univ. Autònoma de Barcelona*

Aquests materials (volums 1 i 2) poden constituir una referència bàsica per a un primer curs d'estadística descriptiva i d'introducció a l'estadística inferencial d'una titulació de les àrees de ciències socials i humanes. De fet, provenen de la revisió minuciosa d'un conjunt de dossiers ja utilitzats en la docència impartida en assignatures amb aquest perfil. El volum 1, elaborat per la professora Mercè Farré i publicat en el número 162 de la col·lecció Materials, se circumscriu a l'estudi descriptiu d'una variable, mentre que en el volum 2 s'analitzen les relacions descriptives entre variables i es fa una introducció a la inferència estadística més elemental. La presentació dels conceptes teòrics i dels instruments tècnics es basa sempre en exemples concrets que en faciliten la comprensió. El programari SPSS s'ha utilitzat

per produir la major part de resultats, que tanmateix podrien haver-se obtingut amb d'altres aplicacions. El text disposa de llistes d'exercicis resolts i d'enunciats no resolts per estimular l'aprenentatge i alhora motivar el treball individual. Xavier Bardina Simorra i Mercè Farré Cervelló són professors titulars de la Unitat d'Estadística i d'Investigació Operativa del Departament de Matemàtiques de la UAB i Pedro López-Roldán és professor titular del Departament de Sociologia de la UAB. Tots tres tenen una àmplia experiència docent, tant en assignatures especialitzades de les seves respectives àrees de coneixement, com en assignatures d'estadística aplicada a les ciències socials i a les ciències humanes. Han impartit docència en diverses titulacions de la Universitat Autònoma de Barcelona, com les de Ciències Polítiques i de Sociologia. La recerca de Xavier Bardina i de Mercè Farré se centra en l'àmbit de la probabilitat i, més concretament, dels processos estocàstics, mentre que la recerca de Pedro López combina interessos metodològics de la investigació social amb diverses temàtiques de recerca al si del Grup d'Estudis Sociològics sobre la Vida Quotidiana i el Treball (QUIT).

Building Capacity for Evidence-Informed Policy-Making

Lessons from Country Experiences

This report analyses the skills and capacities governments need to strengthen evidence-informed policy-making (EIPM) and identifies a range of possible interventions that are available to foster greater uptake of evidence. Increasing governments' capacity for evidence-informed is a critical part of good public governance. However, an effective connection between the

supply and the demand for evidence in the policy-making process remains elusive. This report offers concrete tools and a set of good practices for how the public sector can support senior officials, experts and advisors working at the political/administrative interface. This support entails investing in capability, opportunity and motivation and through behavioral changes. The report identifies a core skillset for EIPM at the individual level, including the capacity for understanding, obtaining, assessing, using, engaging with stakeholders, and applying evidence, which was developed in collaboration with the European Commission Joint Research Centre. It also identifies a set of capacities at the organisational level that can be put in place across the machinery of government, throughout the role of interventions, strategies and tools to strengthen these capacities. The report concludes with a set of recommendations to assist governments in building their capacities.

Freshwater Algae

Identification and Use as Bioindicators *John Wiley & Sons*

Freshwater Algae provides a comprehensive guide to temperate freshwater algae, with additional information on key species in relation to environmental characteristics and implications for aquatic management. Existing books on freshwater algae fall into two categories: simple identification texts or highly specialised research volumes. There is currently nothing in between that

practitioners and students can use on a regular basis. The authors filled this gap with the first edition which provided an accessible, visually appealing volume that is of immediate use to aquatic biologists for algal identification that includes key environmental information on major species. The book is divided into two parts: part I is a general introduction to algae and techniques for sampling, measuring and observation and then looks at the role of algae as bioindicators and the implications for aquatic management, part II provides the identification of major genera and 250 important species. The book is well illustrated in full colour with numerous original illustrations and photographs. This new revised edition will retain the same clear writing style and accessible format of the first edition with new coverage of species from North America, Asia and Australia in addition to expanded coverage of molecular and computational techniques in algal biology.

The Creatures of Philippine Lower Mythology

IMAGINARY CREATURES depicted in a people's lower mythology are one of the most important phenomena in their belief systems. This is because the common folk in particular must strive to maintain harmonious relations with these creatures, a continuous process that permeates many aspects of their everyday lives and requires the intercession of a special person in the community who acts as the medium of communication between them. The subject of Maximo D. Ramos's work is the creatures of Philippine lower mythology, as this level of folklore is called. In undertaking this study, Dr. Ramos directed his efforts to two principal tasks: (1) making a taxonomic classification of all the beings which in

his opinion fall within the framework of the problem as found in Philippine folk beliefs, and (2) correlating the implications of these beliefs, in terms of these classifications, to education, particularly on the elementary level. The taxonomic classification is intended to help clear up the confusion that attended earlier studies of these creatures. This is indeed the first attempt to systematize the identities of these Philippine mythological beings for the benefit of folklore scholarship. More specifically, Ramos writes: "Where names, traits, and functions appear to have become confused ... through the process of transfer that constantly occurs in traditional lore, it was thought fruitful to point these out and then attempt to account for them". In spite of the very extensive Christianization of the Filipinos-particularly the lowlanders-these mythical entities still persist in their traditional belief systems, hence the student of folk traditions cannot ignore them if he is to achieve greater relevance in his studies. Little by little the perspective from which these creatures have been traditionally viewed is bound to change until they are accepted as part of our cultural heritage. This change is bringing about an understanding of these creatures' function in our society. The present work is primarily taxonomic in nature but it sheds light into many of the dark corners of Philippine folklore studies and brings to the reader a fuller understanding of the most maligned inhabitants of the Philippine other-world. Herein lies the major contribution of Dr. Ramos-a basic recognition and a deeper insight into the cultural heritage of the Filipino.

Understanding Psychological Projection *Koa Books*

Robert A. Johnson, bestselling author of *He, She, We* and other psychology classics, shares a lifetime of insights and experiences in this easy-to-read book on psychological projection - seeing traits in others that are, in fact, our own. Drawing on early

Christianity, mediaeval alchemy, depth psychology and the myths of *The Flying Dutchman* and *The Once and Future King*, he, also, explores the subjects of loneliness, fundamentalist religion and the spiritual dimensions of psychology.
