Harley-Davidson may be getting ready for its future models with new technology. And this time, it's for a new v-twin engine which will use variable valve timing (VVT), as well as a modular engine balancer. Latest patent images show how that the new v-twin engine will be different from existing Harley-Davidson engines, and how the VVT system works in tandem with the modular balancer.

Harley Engines for sale in UK | 26 used Harley Engines

Valvetrain problems in early Knucklehead engines required a redesign halfway through its first year of production and retrofitting of the new valvetrain on earlier engines. By 1937, all Harley-Davidson flathead engines were equipped with dry-sump oil recirculation systems similar to the one introduced in the "Knucklehead" OHV engine.

Harley-Davidson - Wikipedia

These complete Harley-Davidson engines can be divided into four categories: one-cylinder engine, big twin engines, sports engine, and water-cooled engines. One-Cylinder Engines:

These used Harley engines were mainly manufactured for single-cylinder motorcycles. They were produced regularly until 1934 before big twin engines took over. If you ...

Complete Engines for Harley-Davidson for sale | eBay

Harley-Davidson has filed a patent for a new engine design that uses variable valve timing. Officially, the patent is not specifically for a VVT system but rather for a modular engine balancer that mounts on either side of a crankshaft. The patent does however describe how the VVT phase timing is incorporated into the balancer module.

Harley-Davidson

Files Patent for New V-Twin Engine with VVT

The Harley-Davidson Milwaukee-eight engine has been installed in all Touring models since model year 2017 and in new Softail vehicles since 2018. After almost 20 years, the engine replaces the Twin Cam engine, from which it differs markedly through its four-valve technology and better response from the speed cell.
