Re-viewing Fascism *Indiana University Press*

When Benito Mussolini proclaimed that "Cinema is the strongest weapon," he was telling only half the story. In reality, very few feature films during the Fascist period can be labeled as propaganda. Re-viewing Fascism considers the many films that failed as "weapons" in creating cultural consensus and instead came to reflect the complexities and contradictions of Fascist culture. The volume also examines the connection between cinema of the Fascist period and neorealism—ties that many scholars previously had denied in an attempt to view Fascism as an unfortunate deviation in Italian history. The postwar directors Luchino Visconti, Roberto Rossellini, and Vittorio de Sica all had important roots in the Fascist era, as did the Venice Film Festival. While government censorship loomed over Italian filmmaking, it did not prevent frank depictions of sexuality and representations

of men and women that challenged official gender policies. Reviewing Fascism brings together scholars from different cultural and disciplinary backgrounds as it offers an engaging and innovative look into Italian cinema, Fascist culture, and society.

Russian Foreign Policy in the Twenty-First Century and the Shadow of the Past *Columbia University Press*

Because the turbulent trajectory of Russia's foreign policy since the collapse of the Soviet Union echoes previous moments of social and political transformation, history offers a special vantage point from which to judge the current course of events. In this book, a mix of leading historians and political scientists examines the foreign policy of contemporary Russia over four centuries of history. The authors explain the impact of empire and its loss, the interweaving of domestic and foreign impulses, long-standing approaches to national security, and the effect of globalization over time. Contributors focus on the underlying patterns that have marked Russian foreign policy and that persist today. These patterns are driven by the country's political makeup, geographical circumstances, economic strivings, unsettled position in the larger international setting, and, above all, its tortured effort to resolve issues of national identity. The argument here is not that the Russia of Putin and his successors must remain trapped by these historical patterns but that history allows for an assessment of how much or how little has changed in Russia's approach to the outside world and creates a foundation for identifying what must change if Russia is to

evolve. A truly unique collection, this volume utilizes history to shed crucial light on Russia's complex, occasionally inscrutable relationship with the world. In so doing, it raises the broader issue of the relationship of history to the study of contemporary foreign policy and how these two enterprises might be better joined.

The late Renaissance sculptor Leone Leoni (1509-1590) came from modest beginnings, but died as a nobleman and knight. His remarkable leap in status from his humble birth to a stonemason's family, to his time as a galley slave, to living as a nobleman and courtier in Milan provide a specific case study of an artist's struggle and triumph over existing social structures that marginalized the Renaissance artist. Based on a wealth of discoveries in archival documents, correspondence, and contemporary literature, the author examines the strategies Leoni employed to achieve his high social position, such as the friendships he formed, the type of education he sought out, the artistic imagery he employed, and the aristocratic trappings he donned. Leoni's multiple roles (imperial sculptor, aristocrat, man of erudition, and criminal), the visual manifestations of these roles in his house, collection, and tomb, the form and meaning of

the artistic commissions he undertook, and the particular successes he enjoyed are here situated within the complex political, social and economic contexts of northern Italy and the Spanish court in the sixteenth century.
