Geothermal Engineer - Career, Role, Education, Jobs & Salary

Harnessing geothermal heat and power as a renewable energy source is the job

of geothermal engineers. Geothermal engineers can obtain geothermal energy either by pumping cold water into a geothermal reservoir which allows the heat to turn the water into steam and return to the surface, or by getting it directly from the earth from natural geothermal reservoirs close to the surface.

What does a geothermal engineer do? - CareerExplorer

What does a Geothermal Engineer do? The term “geothermal” refers to heat that stems from the core or the surface of the Earth. The heat is generated in one of two ways: 1) The sun heats the first few feet of the Earth’s surface, and 2) Radioactive materials decay deep in the Earth’s core, producing heat. A

Geothermal Engineer uses these two naturally occurring phenomena to design systems that produce heat and electricity.
