A Measure Of All Things

Measurement is the quantitative way of comparing of one thing with another. The International System of Units, also known as the SI, is by far the most widely used system of measurement in the world. It is a coherent system of seven base units (kilogram, metre, second, ampere, kelvin, mole, candela) which allow science, industry and trade to measure all physical objects and phenomena in the same way, using the same units and get the same number.
