29.3C: Evolution of Amniotes - Biology LibreTexts
(Mammals). Activity B. Tell learners that birds and mammals (including humans) are vertebrates. This means that they have a backbone and, in most cases, they have a skeleton inside their bodies.

Take a few moments to let learners feel their bones under their skin (knuckles, wrists, elbows and knees are obvious bones to feel easily).

Getting into... birds and mammals - WWT Learning Zone
Birds. Birds must be capable of high rates of gas exchange because their oxygen consumption at rest is higher than that of all other vertebrates, including mammals, and it increases many times during flight. The gas volume of the bird lung is small compared with that of mammals, but the lung is connected to voluminous air sacs by a series of tubes, making the total volume of the respiratory system about twice that of mammals of comparable size.
