Like every process and behavior, information seeking contains both

cognition and emotion. For conscientious persons achievement orientation and goal-directedness color both their thoughts and their emotions around information seeking.

Information-Seeking Behavior - an overview | ScienceDirect ...

Information seeking may be understood as a more human-oriented and open-ended process than information retrieval. In information seeking, one does not know whether there exists an answer to one's query, so the process of seeking may provide the learning required to satisfy one's information need .

Information seeking - Wikipedia

Web information seeking and interaction

(i.e., the interaction of users with Web-based content and applications during information-seeking activities) is a topic that unites many strands of academic and commercial research, from studies of information-seeking behaviour to the design and construction of large-scale interactive systems.

Web Information Seeking and Interaction

Information seeking behavior is a more specific concept of information behavior. It specifically focuses on searching, finding, and retrieving information. Information seeking behavior research can focus on improving information systems or, if it includes information need, can also focus on why the user behaves the way they do.

Information behavior - Wikipedia
