Interesting Facts to Know ...

This busy brown organ plays an important role in the human digestive system — it's your largest internal organ and has about 500 different jobs! It's like a chemical processing factory — blood carries nutrients there from the small intestine, then the liver decides what to do with them. It also gets rid of toxins (substances that can be harmful to the body), recycles old blood cells, makes bile and other digestive juices, and produces, stores and releases glucose (to give you energy).
