Agriculture Environment And Health Sustainable

Sustainable agricultural development (SAD) seems to pose new challenges to agricultural research and extension. But much of what is required is really not that different from what was asked of these institutions 20 years ago, when they were expected to turn their attention to small farmers and small-farmer crops.

Agriculture, Environment, and Health: Sustainable ...

For agriculture to be sustainable, land and water must be used efficiently to reduce negative impact on the environment and ensure resilience to climate change. We can't achieve global food security without preserving the services that ecosystems such as trees and forests provide, and we can't sustain forests without thinking of how we will feed a growing global population.
