The Awakening *Graphic Arts Books*

First appearing in 1899 *The Awakening* is regarded as work presaging both feminist fiction and literary modernism. The author's clear vision of a woman's internal and external conflicts continue to demand engagement and response from readers. *The Awakening* follows Edna Pontellier as she recognizes and attempts to deal with her confining lot as a woman and mother in the 19th century American South. Torn between traditional roles and an inchoate desire for independence and a more passionate life, she faces more than one difficult choice, leading to a grim reckoning. Initially receiving a mixed critical reception, including much condemnation for its frank depiction of adultery, the novel has gone on to be recognized as both a classic piece of fiction and a groundbreaking work of women's realism. The poignant portrayal of the protagonist attempting to determine her true feminine identity makes this one of the first novels willing to openly confront women's issues, to make clear that traditional roles could be limiting and to legitimize an emotional life that transcended society's boundaries. With an eye-catching new cover, and professionally typeset manuscript, this edition of *The Awakening* is both modern and readable.

Good Natured *Harvard University Press*

Mama's Last Hug: Animal Emotions and What They Tell Us about Ourselves *W. W. Norton & Company*

New York Times best-selling author and primatologist Frans de Waal explores the fascinating world of animal and human emotions. Frans de Waal has spent four decades at the forefront of animal research. Following up on the best-selling *Are We Smart Enough to Know How Smart Animals Are?*, which investigated animal intelligence, *Mama's Last Hug* delivers a fascinating exploration of the rich emotional lives of animals. *Mama's Last Hug* begins with the death of Mama, a chimpanzee matriarch who formed a deep bond with biologist Jan van Hooff. When Mama was dying, van Hooff took the unusual step of visiting her in her night cage for a last hug. Their goodbyes were filmed and went viral. Millions of people were deeply moved by the way Mama embraced the professor, welcoming him with a big smile while reassuring him by patting his neck, in a gesture often considered typically human but that is in fact common to all primates. This story and others like it form the core of de Waal's argument, showing that humans are not the only species with the capacity for love, hate, fear, shame, guilt, joy, disgust, and empathy. De Waal discusses facial expressions, the emotions behind human politics, the illusion of free will, animal sentience, and, of course, Mama's life and death. The message is one of continuity between us and other species, such as the radical proposal that emotions are like organs: we don't have a single organ that other animals don't have, and the same is true for our emotions. *Mama's Last Hug* opens our hearts and minds to the many ways in which humans and other animals are connected, transforming how we view the living world around us.

Age of Cage

Four Decades of Hollywood Through One Singular Career *Henry Holt and Company*

Icon. Celebrity. Artist. Madman. Genius. Nicolas Cage is many things, but love him, or laugh at him, there's no denying two things: you've seen one of his many films, and you certainly know his name. But who is he, really, and why has his career endured for over forty years, with more than a hundred films, and birthed a million memes? *Age of Cage* is a smart, beguiling book about the films of Nicolas Cage and the actor himself, as well as a sharp-eyed examination of the changes that have taken place in Hollywood over the course of his career. Critic and journalist Keith Phipps draws a portrait of the enigmatic icon by looking at—what else?—Cage's expansive filmography. As Phipps delights in charting Cage's films, *Age of Cage* also chronicles the transformation of film, as Cage's journey takes him through the world of 1980s comedies (*Valley Girl*, *Peggy Sue Got Married*, *Moonstruck*), to the indie films and blockbuster juggernauts of the 1990s (*Wild at Heart*, *Leaving Las Vegas*, *Face/Off*, *Con Air*), through the wild and unpredictable video-on-demand world of today. Sweeping in scope and intimate in its profile of a fiercely passionate artist, *Age of Cage* is, like the man himself, surprising, insightful, funny, and one of a kind. So, snap out of it, and enjoy this appreciation of Nicolas Cage, national treasure.

Respecting Animals

A Balanced Approach to Our Relationship with Pets, Food, and Wildlife *Prometheus Books*

A legal scholar and animal-rights expert argues for a practical approach to using animals respectfully. In this fresh approach to the animal rights debate, a legal scholar and expert on the humane treatment of animals argues for a middle ground between the extreme positions that often receive the most public attention. Professor Favre advocates an ethic of respectful use of animals, which finds it acceptable for humans to use animals within limited boundaries. He looks at various communities where humans and animals interact: homes, entertainment, commercial farms, local wildlife, and global wildlife. Balancing the interests of

the animal against the interests of the human actor is considered in detail. The author examines the following questions, among others: Is it ethically acceptable to shoot your neighbor's dog for barking hours on end? Is it ethical for a zoo to keep a chimpanzee in an exhibit? Is it ethical to eat the meat of an animal? Finally, he discusses how good ethical outcomes can best be transported into the legal system. The author suggests the creation of a new legal category, living property, which would enhance the status of animals in the legal system. This thoughtful, well-argued, and elegantly written book provides readers with a comprehensive and practical context in which to consider their personal and social relationships with animals.

Animals

A Novel *Catapult*

A riveting dystopian novel that examines how humans mistreat animals, and each other: "A powerful piece of writing, and a disturbing call to conscience" (J.M. Coetzee). It is more than 100 years in the future and the horrors of factory farming, combined with the widespread abuse of antibiotics, have led to mass extinctions. The majority of all mammals, birds, and fish that humans have eaten for millennia no longer exist. Those not fully capable are deemed undeserving of an equal share of scarce medical resources and are ultimately classified as less than human. As paranoia about our food supplies spreads, a forceful new logic takes hold; in the blink of a millennial eye the disenfranchised have become our food. Don LePan's "well-plotted" and "formally audacious" novel shows us a world at once eerily foreign and disturbingly familiar (Booklist). It follows the dramatic events that unfold within a family after they take in an abandoned mongrel boy. In the sharp-edged poignancy of the ethical questions it poses, in the striking narrative techniques it employs, and above all, in the remarkable power of the story it tells, *Animals* proves itself a transformative work of fiction.

Night Animals *Penguin*

Possum is hiding from the sounds in the night, and his fear sets off a chain reaction in the other night animals.

When Rabbit Howls *Penguin*

A woman diagnosed with dissociative identity disorder reveals her harrowing journey from abuse to recovery in this #1 New York Times bestselling autobiography written by her own multiple personalities. Successful, happily married Truddi Chase began therapy hoping to find the reasons behind her extreme anxiety, mood swings, and periodic blackouts. What emerged from her sessions was terrifying: Truddi's mind and body were inhabited by the Troops—ninety-two individual voices that emerged to shield her from her traumatizing childhood. For years the Troops created a world where she could hide from the pain of the ritualized sexual abuse she suffered at the hands of her own stepfather—abuse that began when she was only two years old. It was a past that Truddi didn't even know existed, until she and her therapist took a journey to where the nightmare began... Written by the Troops themselves, *When Rabbit Howls* is told by the very alter-egos who stayed with Truddi Chase, watched over her, and protected her. What they reveal is a spellbinding descent into a personal hell—and an ultimate, triumphant deliverance for the woman they became.

Loser *Harper Collins*

From renowned Newbery-winning author Jerry Spinelli comes a powerful story about how not fitting in just might lead to an incredible life. This classic book is perfect for fans of Gordon

Korman and Carl Hiaasen. Just like other kids, Zinkoff rides his bike, hopes for snow days, and wants to be like his dad when he grows up. But Zinkoff also raises his hand with all the wrong answers, trips over his own feet, and falls down with laughter over a word like "Jabip." Other kids have their own word to describe him, but Zinkoff is too busy to hear it. He doesn't know he's not like everyone else. And one winter night, Zinkoff's differences show that any name can someday become "hero." With some of his finest writing to date and great wit and humor, Jerry Spinelli creates a story about a boy's individuality surpassing the need to fit in and the genuine importance of failure. Rattling the Cage

Toward Legal Rights for Animals *Hachette+ORM*

The scholar and author of *An American Trilogy* makes the case to establish legal rights for chimpanzees and bonobos. *Rattling the Cage* explains how the failure to recognize the basic legal rights of chimpanzees and bonobos in light of modern scientific findings creates a glaring contradiction in our law. In this witty, moving, persuasive, and impeccably researched argument, Wise demonstrates that the cognitive, emotional, and social capacities of these apes entitle them to freedom from imprisonment and abuse. "The animals' Magna Carta." —Jane Goodall, from the Foreword "This is an impassioned, fascinating, and in many ways startling book." —Cass Sunstein, *New York Times Book Review* "One of those rare books that are deeply troubling in the best sense of the word, intellectually and ethically." —Edward O. Wilson, *Harvard University* "Path-breaking...Every lawyer, every judge, and every legislator should read this book." —Peter Singer, *Princeton University* "Documenting the treatment of our close primate cousins, which are routinely kidnapped for biomedical research, slaughtered for their meat and caged in roadside zoos, Wise notes that chimpanzees and bonobos are nearing annihilation . . . This impassioned, closely argued brief presents a formidable challenge to the treatment of animals perpetrated by agribusiness, scientific research, the pharmaceutical industry, hunters, live-animal traders and others. It's a clarion call for rethinking the animal-human relationship." —*Publishers Weekly*

National Science Education Standards *National Academies Press*

Americans agree that our students urgently need better science education. But what should they be expected to know and be able to do? Can the same expectations be applied across our diverse society? These and other fundamental issues are addressed in National Science Education Standards--a landmark development effort that reflects the contributions of thousands of teachers, scientists, science educators, and other experts across the country. The National Science Education Standards offer a coherent vision of what it means to be scientifically literate, describing what all students regardless of background or circumstance should understand and be able to do at different grade levels in various science categories. The standards address: The exemplary practice of science teaching that provides students with experiences that enable them to achieve scientific literacy. Criteria for assessing and analyzing students' attainments in science and the learning opportunities that school science programs afford. The nature and design of the school and district science program. The support and resources needed for students to learn science. These standards reflect the principles that learning science is an inquiry-based process, that science in schools should reflect the intellectual traditions of contemporary science, and that all Americans have a role in improving science education. The Book of M

A Novel HarperCollins

Set in a dangerous near future world, *The Book of M* tells the captivating story of a group of ordinary people caught in an extraordinary catastrophe who risk everything to save the ones they love. The phenomenon spreads like a plague, and while those afflicted gain a strange new power, it comes at a horrible price: the loss of all their memories. Ory and his wife Max have escaped the forgetting so far by hiding in an abandoned hotel deep in the woods. Their new life feels almost normal, until one day Max's shadow disappears too. Knowing that the more she forgets, the more dangerous she will become to Ory, Max runs away. But Ory refuses to give up the time they have left together. Desperate to find Max before her memory disappears completely, he follows her trail across a perilous, unrecognizable world, braving the threat of roaming bandits, the call to a new war being waged on the ruins of the capital, and the rise of a sinister cult that worships the shadowless. As they journey, each searches for answers: for Ory, about love, about survival, about hope; and for Max, about a new force growing in the south that may hold the cure. Like *The Passage* and *Station Eleven*, this haunting, thought-provoking, and beautiful novel explores fundamental questions of memory, connection, and what it means to be human in a world turned upside down.

The State of the World's Land and Water Resources for Food and Agriculture

Managing Systems at Risk Routledge

The State of the World's Land and Water Resources for Food and

Agriculture is FAO's first flagship publication on the global status of land and water resources. It is an 'advocacy' report, to be published every three to five years, and targeted at senior level decision makers in agriculture as well as in other sectors. SOLAW is aimed at sensitizing its target audience on the status of land resources at global and regional levels and FAO's viewpoint on appropriate recommendations for policy formulation. SOLAW focuses on these key dimensions of analysis: (i) quantity, quality of land and water resources, (ii) the rate of use and sustainable management of these resources in the context of relevant socio-economic driving factors and concerns, including food security and poverty, and climate change. This is the first time that a global, baseline status report on land and water resources has been made. It is based on several global spatial databases (e.g. land suitability for agriculture, land use and management, land and water degradation and depletion) for which FAO is the world-recognized data source. Topical and emerging issues on land and water are dealt with in an integrated rather than sectoral manner. The implications of the status and trends are used to advocate remedial interventions which are tailored to major farming systems within different geographic regions.

The first comprehensive expose on damage dogs and their families suffer from excessive crating, both in puppy mills and private homes. *Dogs Hate Crates* reveals that many owners who buy their dogs rhinestone collars and call them "babies" also lock them in small cages for 18-23 hours a day. And although "crate training" is proven to cause hundreds of physical, emotional and social problems and is a poor method for behavior and housetraining, many dog industry "experts", motivated by \$50 Billion in greed, are attempting to persuade America that "dogs love crates". Free of emotional bias, *Dogs Hate Crates* details scientific and neurologic research, expert opinions and true case studies to demonstrate hundreds of serious symptoms caused by excessive crating, ranging from fear to dislike of humans. The book also contrasts cases of criminally abusive crating, puppy mill raids and atrocities against dogs with quotes from well-loved animal behavior experts on dogs transforming lives as nature's ambassadors and physical healers. And the authors provide

effective behavior shaping and housetraining instructions as alternatives to crating. Contemporary cultural trends make America vulnerable to crating propaganda at home; and allow commercial puppy mill breeders who keep dogs caged their entire lives to sell as many as 4 million pups a year to unsuspecting consumers. *Dogs Hate Crates* examines the relationship between monetary profit and the growing popularity of caging dogs, and identifies surprising players in the pet industry and beyond that likely benefit in the millions, and billions, from dogs' and owners' distress. This groundbreaking book is meant to inspire further action and investigation by behavior experts, veterinarians, scientists, journalists/media and government- and everyone who cares about animals- to remedy one of the biggest abuses of dogs today. (*Dogs Hate Crates* is the new updated version of the book originally titled *Caged Love*.)

The Humane Economy

How Innovators and Enlightened Consumers Are Transforming the Lives of Animals *HarperCollins*

A major new exploration of the economics of animal exploitation and a practical roadmap for how we can use the marketplace to

promote the welfare of all living creatures, from the renowned animal-rights advocate Wayne Pacelle, President/CEO of the Humane Society of the United States and New York Times bestselling author of *The Bond*. In the mid-nineteenth century, New Bedford, Massachusetts was the whaling capital of the world. A half-gallon of sperm oil cost approximately \$1,400 in today's dollars, and whale populations were hunted to near extinction for profit. But with the advent of fossil fuels, the whaling industry collapsed, and today, the area around New Bedford is instead known as one of the best places in the world for whale watching. This transformation is emblematic of a new sort of economic revolution, one that has the power to transform the future of animal welfare. In *The Humane Economy*, Wayne Pacelle, President/CEO of the Humane Society of the United States, explores how our everyday economic decisions impact the survival and wellbeing of animals, and how we can make choices that better support them. Though most of us have never harpooned a sea creature, clubbed a seal, or killed an animal for profit, we are all part of an interconnected web that has a tremendous impact on animal welfare, and the decisions we make—whether supporting local, not industrial, farming; adopting a rescue dog or a shelter animal instead of one from a “puppy mill”; avoiding products that compromise the habitat of wild species; or even seeing Cirque du Soleil instead of Ringling Brothers—do matter. *The Humane Economy* shows us how what we do everyday as consumers can benefit animals, the

environment, and human society, and why these decisions can make economic sense as well.
