A structure is an arrangement and organization of interrelated elements in a material object or system, or the object or system so organized. Material structures include man-made objects such as buildings and machines and natural objects such as biological organisms, minerals and chemicals. Abstract structures include data structures in computer science and musical form. Types of structure include a hierarchy, a network featuring many-to-many links, or a lattice featuring connections between com

Structure - Wikipedia

“archistructure” (architecture and structure)In this stream, which can be . identified throughout history, the structural design is one of the main generators of the architectural language. Here there is a strong correlation between form, loads and materials and in many cases the equation is - “architecture = structure

Structural design in nature and in architecture

Green building (also known as green construction or sustainable building) refers to both a structure and the application of processes that are environmentally responsible and resource-efficient throughout a building's life-cycle: from planning to design, construction, operation, maintenance, renovation, and demolition. This requires close cooperation of the contractor, the architects, the ...

Green building - Wikipedia

Just as Mycenaean architecture seems to have influenced the classical Greeks, so the structures raised by the Etruscans are important in the evolution of ancient Roman architecture. The Etruscans probably originated in Asia Minor and settled in west-central Italy (Etruria), between the rivers Arno and Tiber .

History of architecture - Wikipedia

Bioinspired architecture could pave the way for stronger, lighter structures. When we think about sponges, we tend to think of something soft and squishy. But researchers from the Harvard John A. Paulson School of Engineering and Applied Sciences (SEAS) are using the glassy skeletons of marine sponges as inspiration for the next generation of stronger and taller buildings, longer bridges, and ...

Bioinspired Architecture: Next Generation of Skyscrapers ...

A church building or church house, often simply called a church, is a building used for Christian religious activities, particularly for Christian worship services. The term is often used by Christians to refer to the physical buildings where they worship, but it is sometimes used as an analogy to refer to buildings of other religions. In traditional Christian architecture, a church interior ...
