Teeth *The New Press*

An NPR Best Book of 2017 "[Teeth is] . . . more than an exploration of a two-tiered system—it is a call for sweeping, radical change." —New York Times Book Review "Show me your teeth," the great naturalist Georges Cuvier is credited with saying, "and I will tell you who you are." In this shattering new work, veteran health journalist Mary Otto looks inside America's mouth, revealing unsettling truths about our unequal society. Teeth takes readers on a disturbing journey into America's silent epidemic of oral disease, exposing the hidden connections between tooth decay and stunted job prospects, low educational achievement, social mobility, and the troubling state of our public health. Otto's subjects include the pioneering dentist who made Shirley Temple and Judy Garland's teeth sparkle on the silver screen and helped create the all-American image of "pearly whites"; Deamonte Driver, the young Maryland boy whose tragic death from an abscessed tooth sparked congressional hearings; and a marketing guru who offers advice to dentists on how to push new and expensive treatments and how to keep Medicaid patients at bay. In one of its most disturbing findings, Teeth reveals that toothaches are not an occasional inconvenience, but rather a chronic reality for millions of people, including disproportionate numbers of the elderly and people of color. Many people, Otto reveals, resort to prayer to counteract the uniquely devastating effects of dental pain. Otto also goes back in time to understand the roots of our predicament in the history of dentistry, showing how it became separated from mainstream medicine, despite a century of growing evidence that oral health and general bodily health are closely related. Muckraking and paradigm-shifting, Teeth exposes for the first time the extent and meaning of our oral health crisis. It joins the small shelf of books that change the way we view society and ourselves—and will spark an urgent conversation about why our teeth matter.

The Cadaver King and the Country Dentist *PublicAffairs*

A shocking and deeply reported account of the persistent plague of institutional racism and junk forensic science in our criminal justice system, and its devastating effect on innocent lives After two three-year-old girls were raped and murdered in rural Mississippi, law enforcement pursued and convicted two innocent men: Kennedy Brewer and Levon Brooks. Together they spent a combined thirty years in prison before finally being exonerated in 2008. Meanwhile, the real killer remained free. The Cadaver King and the Country Dentist recounts the story of how the criminal justice system allowed this to happen, and of how two men, Dr. Steven Hayne and Dr. Michael West, built successful careers on the back of that structure. For nearly two decades, Hayne, a medical examiner, performed the vast majority of Mississippi's autopsies, while his friend Dr. West, a local dentist, pitched himself as a forensic jack-of-all-trades. Together they became the go-to experts for prosecutors and helped put countless Mississippians in prison. But then some of those convictions began to fall apart. Here, Radley Balko and Tucker Carrington tell the haunting story of how the courts and Mississippi's death investigation system -- a relic of the Jim Crow era -- failed to deliver justice for its citizens. The authors argue that bad forensics, structural racism, and institutional failures are at fault, raising sobering questions about our ability and willingness to address these crucial issues.

This thought-provoking book by Harold Shapiro, former president of both Princeton University and the University of Michigan, and Chairman of the National Bioethics Advisory Commission under President Bill Clinton, explores the role the modern university should play as an ethical force and societal steward. Based on the 2003 Clark Kerr lectures, A Larger Sense of Purpose draws from Shapiro's twenty-five years of experience leading major research universities and takes up key topics of debate in higher education. What are the nature and objectives of a liberal education? How should universities address the increasing commercialization not only of intercollegiate sports but of education and research? What are the university's responsibilities for the moral education of students? The book begins with an expanded history of the modern research institution followed by essays on ethics, the academic curriculum, the differences between private and public higher education, the future of intellectual property rights, and the changing relationship between the nation's universities and the for-profit sector. Shapiro calls for universities to be more accountable morally as well as academically. He urges scientists not only to educate others about the potential and limitations of science but also to acknowledge the public's distress over the challenges presented by the very success of the scientific enterprise. He advocates for a more intimate connection between professional training and the liberal arts--in the hope that future doctors, lawyers, and business executives will be educated in ethics and the social sciences as well as they are in anatomy, torts, and leveraged buyouts. Candid, timely, and provocative, A Larger Sense of Purpose demands the attention of not only those in academics but of anyone who shares an interest in the soul of education.
