The Geography Of Thought Richard

The Geography of Thought: How Asians and Westerners Think Differently...and Why is a book by social psychologist Richard Nisbett that was published by Free Press in 2003. By analyzing the differences between Asia and the West, it argues that cultural differences affect people's thought processes more significantly than believed.

The Geography of Thought - Wikipedia

The Geography of Thought documents Richard Nisbett's groundbreaking international research in cultural psychology and shows that people actually think about—and even see—the world differently because of differing ecologies, social structures, philosophies, and educational systems that date back to ancient Greece and China. As a result, East Asian thought is “holistic”—drawn to the perceptual field as a whole and to relations among objects and events within that field.

The Geography of Thought: How Asians and Westerners Think ...

Richard E. Nisbett's The Geography of Thought examines the age-old question that has intrigued psychologists (and anyone, really) for centuries: how do Eastern and Western modes of thought differ, and why? In the book, Nisbett begins by explaining the core foundations of thought on either side.

As Professor Nisbett shows in The Geography of Thought people actually think - and even see - the world differently, because of differing ecologies, social structures, philosophies, and educational systems that date back to ancient Greece and China, and that have survived into the modern world. As a result, East Asian thought is "holistic" - drawn to the perceptual field as a whole, and to relations among objects and events within that field.

The Geography of Thought : How Asians and Westerners Think ...

The Geography of Thought is a 2003 sociology book by American social scientist and psychologist Richard Nisbett. The book is subtitled How Asians and Westerners Think Differently...And Why, and Nesbitt’s somewhat controversial thesis is that Western peoples and Asian peoples are fundamentally different on a cognitive level and that this is true as a function of deep-seated cultural pressures as opposed to biological, evolutionary ones.
