Suture Materials - Types, Materials used and Techniques in ...

Technique The procedure is simple and repetitive. A single interrupted suture is used to make the initial tie. The needle is next inserted through the outer surface of the buccal flap and the

underlying surface of the lingual flap. The needle is then passed through the remaining loop of the suture, and the suture is pulled tightly, thus locking it. This procedure is continued until the final suture is tied off at the terminal end 146
