Urban Road Design

A Guide to the Geometric Design of Major Urban Roads

"This major work provides guidelines for the geometric design of major urban roads and has been prepared by Austroads member agencies and industry experts to promote a common, standard approach to urban road design across Australia and New Zealand. Geometric road design guidelines are used as an aid to achieving consistent and operationally effective road designs. This guide represents the combined experience

and international best practices of Austroads member agencies and industry experts in this area of geometric design. The result is an up-to-date coverage of Australian and New Zealand road design practice. Urban Road Design includes: definition of major urban roads; fundamental design considerations including performance requirements, traffic volumes and environmental considerations; design inputs such as speed and sight distance; geometric design guidelines for horizontal, vertical alignment, and cross section; other considerations such as intersections at grade, road safety and drainage and comprehensive

glossary of terms. Urban Road Design is intended for use by general and local government practitioners working in road and traffic engineering and other related disciplines. Undergraduate and postgraduate students may also use it." - AustRoads website.

Pedestrian and cyclist paths. Part 6A

"The 'Guide to road design -- Part 6A: pedestrian and cyclist paths' provides guidance for road designers and other practitioners on the design of paths for safe and efficient walking

and cycling. The guide provides a brief introduction to planning and the need for a path, describes the types of path and covers the requirements of path users. However, the main focus of Part 6A is the geometric design of paths and related facilities ... Detailed guidance is provided on path location, alignment, width, clearances, crossfall, drainage and sight distance requirements."-- Summary, preliminary p.

Cycling Aspects of Austroads Guides

"Cycling Aspects of Austroads Guides contains information that relates to the planning, design and traffic management of cycling facilities and is

sourced from Austroads Guides, primarily the Guide to Road Design, the Guide to Traffic Management and the Guide to Road Safety. It is intended as a guide for engineers, planners and designers involved in the planning, design, construction and management of cycling facilities. Throughout the document practitioners are referred to relevant Austroads Guides for additional information. Cycling Aspects of Austroads Guides provides information about: planning and traffic management considerations design guidance relating to on-road and off-road bicycle facilities construction and maintenance considerations provision for cyclists at structures, traffic control devices and end of trip facilities. This is the second edition of Cycling Aspects of Austroads Guides. This edition has been revised to ensure its currency and to clarify and highlight links to other Austroads Guides. Key updates include: improving cross-references to other Austroads guidance, including summary cross-reference tables at the beginning of each section providing broader consideration of other Austroads Guides applicable to cycling updating the report to reflect new editions of the Guide to Traffic Management (Parts 3, 6 and 9) and Guide to Road Safety (Part 1) enhancing or clarifying guidance for topics such as path

crossings of roads, access considerations at freeway interchanges, construction and maintenance considerations and pavements for cycling. The full publication and a quick reference guide are available. In both documents, the Guide icons are linked to the relevant guide on this

website"--from Austroads website.
