Bernard Berofsky
Abstract Hardly any
attempt to come to
grips with the classical
problem of free will
and determinism
directly addresses the
metaphysical vision
driving the concerns of
those who believe that
a significant sort of
free will cannot exist in
a deterministic world

(incompatibilists).

**Nature's Challenge
to Free Will - Oxford
Scholarship**

Berofsky goes on to
demonstrate the failure
of efforts to bypass this
result either through a
defense of the
reducibility of all laws
to physical laws or a
defense of the
supervenience of
psychological states on
physical states. A
conception of free will
as self-determination
plus the power of
genuine choice is
possible in a
deterministic world.
