Bank capital, and a bank's liquidity position, are concepts that are central to understanding what banks do, the risks they take and how best those risks should be mitigated — by banks themselves, and by prudential regulators.

**Bank capital and liquidity**

Liquidity is a measure of the cash and other assets banks have available to quickly pay bills and meet short-term

business and financial obligations. Capital is a measure of the resources banks have to absorb losses. Liquid assets are cash and assets that can be converted to cash quickly if needed to meet financial obligations.

### **Bank Capital And Liquidity: Sorting Out The Muddle**

Based on a version of the model calibrated on US data, we find that both

liquidity and capital requirements are needed, and must be set relatively high. They also mutually reinforce each other, except when liquid assets are scarce. Our analysis thus provides broad support for Basel III's "multiple metrics" framework.

### **Basel III Liquidity & Capital Requirements | CFA Institute**

Bank capital and liquidity perform different functions. Equity capital is provided by shareholders and is the first buffer against losses in a downturn. Equity enables banks to shrink the liabilities side of their balance sheets to match a shrinking asset base caused by losses.

### **Bank Capital and Liquidity - Finance Unlocked**

Funding liquidity (FULit) and bank capital (ETAit) serve as our explanatory variables. Total deposits divided by total assets is a measure of funding liquidity (Khan et al., 2017), and total bank equity divided by total assets is proxy for bank capital (Louhichi & Boujelbene, 2017; Roulet, 2018).

### **Capital, funding liquidity, and bank lending in emerging ...**

Two are related to capital and two to liquidity. The capital regulations include a risk-weighted requirement that forces banks that have riskier assets to hold more capital, as well as an unweighted leverage requirement that ties the level of capital to the overall size of the bank

(including off-balance sheet items).

### **Q&A on the use of Liquidity and Capital Buffers**
