Buildings Which Prove Sustainable Architecture and High

...

Green architecture, or green design, is an approach to building that minimizes the harmful effects of construction projects on human health and the environment. The "green" architect or designer attempts to safeguard air, water, and earth by choosing eco-friendly building materials and construction practices.

Introduction to Green Architecture and Design

Throughout his architectural career, Eric Corey Freed and his green architecture firm have tended to veer towards housing designs. He has focused on adapting existing homes to become greener as well as designing ground-breaking plans for new-builds. The house above combines both these approaches.

Top 5 Green Architects | The House Shop Blog

Frank Lloyd Wright is the architect most think of as the father of green, sustainable architecture. Working mainly in the first half of the 20th century, Wright pioneered the philosophy of organic architecture, beloved by Eric Corey Freed, which takes into account the nature of a site, needs of the client and nature of the materials before designing a building, rather than creating a design ...

10 Influential Green Architects | HowStuffWorks

Perhaps even Antoni Gaud and Frank Lloyd Wright designed ""greener"" buildings than most contemporary architects, whose low-energy houses scarcely differ outwardly from traditional ones. James Wines puts up the various - and often

Green Architecture by James Wines - Goodreads

At first glance this seems like an excellent introduction to green architecture. James Wines has assembled an impressive collection of photographs of some of the eco-architecture that has been built over the past 30 years. But, a closer examination reveals numerous holes in the narrative.
