Psychopathology ...

Psychodynamic theory is comprised of a set of psychological theories that arise from the ideas that humans are often driven by unconscious motivations and that adult personality and relationships are often the result of childhood experiences.

Psychodynamic theory originated in the psychoanalytic theories of Sigmund Freud, and includes any theory based on his ideas, including work by Carl Jung, Alfred Adler, and Erik Erikson.

Psychodynamic Theory: Approaches and Proponents

The book is divided into four sections. The first introduces basic psychodynamic theories and

approaches to psychopathology. The second reviews empirically supported psychodynamic approaches to conceptualizing and treating major psychiatric disorders in adults, and the third section focuses on psychodynamic theories about
