In this paper, we construct spherical fuzzy sets and examined how spherical fuzzy sets are advanced tools of the fuzzy sets, intuitionistic fuzzy sets and picture fuzzy sets. Spherical fuzzy set is the direct extension of Pythagorean fuzzy set, we seen that how we put neutral membership, $I_j(r) = 0$ in SPSs to reduce in Pythagorean fuzzy sets. Also seen that how SFSs is extension of picture fuzzy set by taking squares of the membership degrees we obtain the spherical fuzzy sets.

Yang and Chiclana proposed a spherical representation, which allowed usto define a distance function between intuitionistic fuzzy sets. They have shown that the spherical distance is different from those existingdistances in that it is nonlinear with respect to the change of the corresponding fuzzymembership degrees, and thus it seems more appropriate than usual linear distances for nonlinear contexts in 3D spaces.

In spherical fuzzy sets, while the squared sum of membership, non-membership and hesitancy parameters can be between 0 and 1, each of them can be defined between 0 and 1 independently to satisfy that their squared sum is at most equal to 1. In fuzzy set theory, an important class of triangular norms and conorms is the class of continuous Archimedean nilpotent triangular norms and conorms. It has been shown that for such t-norms T there exists a permutation ϕ of $[0,1]$ such that T is the ϕ -transform of the Lukasiewicz t-norm. In this paper we introduce the notion of intuitionistic fuzzy t-norm and t-conorm, and investigate under which conditions a similar representation theorem can be obtained.

Abstract. The extensions of ordinary fuzzy sets such as intuitionistic fuzzy sets (IFS), Pythagorean fuzzy sets (PFS), and neutrosophic sets (NS), whose membership functions are based on three dimensions, aim to describe expert’s judgments more informatively and explicitly. Intuitionistic fuzzy sets form an extension of fuzzy sets: while fuzzy sets give a degree to which an element belongs to a set, intuitionistic fuzzy sets give both a membership degree and a nonmembership degree. The only constraint on those two degrees is that their sum must be smaller than or equal to 1.
