There are eight major glands that help in the functioning of the endocrine system. These are the pituitary gland, hypothalmus, thyroid, parathyroid, adrenals, pineal body and the reproductive glands (testes and ovaries). The pituitary gland is integral to the whole system.

Your one minute guide to the endocrine system | Nursing Times

A great way to study Endocrine diseases is to start with two columns: one for hyper function and one for hypo function. On the side of your columns, write out each receptor gland (i.e. pancreas, thyroid, etc). Then start filling out your chart by listing the symptoms, treatment, and nursing care for

each gland when it is hyper and hypo function.
