Thus, drug abuse and drug dependence are serious risks of misusing prescription drugs. What is Drug Misuse? To misuse a drug is to use a drug for purposes it is not intended for. Using Vicodin for a headache, Xanax for nausea, or any other example of people believing a drug can make them 'feel better.' Misuse involves not following medical instructions, but the person may not necessarily be looking to 'get high' from their use.

There are many social and ethical issues surrounding the use and abuse of drugs. These issues are made complex particularly because of conflicting values concerning drug use within modern societies. Values may be influenced by

multiple factors including social, religious, and personal views. Within a single society, values and opinions can diverge substantially, resulting in conflicts over various issues involving drug abuse.

Drug use - Social and ethical issues of drug abuse ...

Occasional drug use, such as misusing an opioid to get high, can have similarly disastrous effects, including impaired driving and overdose. Do people choose to keep using drugs? The initial decision to take drugs is typically voluntary. But with continued use, a person's ability to exert self-control can become seriously impaired.

Drug misuse management in over 16s - NICE Pathways

Drug misuse refers to the use of a substance for a purpose that is

not consistent with legal or medical guidelines, most often with prescription medications. This could mean taking more than what is prescribed, or taking a medication that was not prescribed to you. Often drug misuse can lead to substance abuse, but that is not always the case.

Substance Use, Misuse and Abuse | Pyramid Healthcare

Prescription medications such as painkillers, sleeping pills, and tranquilizers can cause similar problems. In fact, next to marijuana, prescription painkillers are the most abused drugs in the U.S. and more people die from overdosing powerful opioid painkillers each day than from traffic

accidents and gun deaths combined.

Drug misuse | Topic | NICE

Drug treatment is intended to help addicted individuals stop compulsive drug seeking and use. Treatment can occur in a variety of settings, take many different forms, and last for different lengths of time. Because drug addiction is typically a chronic disorder characterized by occasional relapses, a short-term, one-time treatment is usually not sufficient.
