**When We Clicked**

*One Point Six Technology Pvt Ltd*

Two strangers, one city, four days, one night, one lie and a fantastic journey. 'When We Clicked' is my twisted love story. I am Akhil Parlekar, a Mumbaikar in my early twenties. Like every other Mumbaikar I love my city, consider Sachin Tendulkar a God fantasize about Katrina Kaif, but I am about to die. Before I was dying, I lived my life in four days, when we clicked. It was love at first sight for me, but not for her. I spent the four days with her wandering in the city, thinking that she would fall in love with me, but the night that followed the fourth day, changed everything.

This journey is about emotions like humour, lust, hatred, betrayal, heroism, friendship and the biggest emotion of them all; love. I am letting you in my heart as well as my brain, you be the judge if this is a love story or not. 'You are the protagonist of your life's story, the central character around which all the other characters and incidents occur. When the protagonist of your story changes to someone else, you are in love. That person becomes the central character of your story and everything else revolves around the person you love.'

## **The Dawn of Everything**

### **A New History of Humanity** *Farrar,*

*Straus and Giroux*  
A dramatically new understanding of human history, challenging our most fundamental assumptions about social evolution—from the development of agriculture and cities to the origins of the state, democracy, and inequality—and revealing new possibilities for human emancipation. For generations, our remote ancestors have been cast as primitive and childlike—either free and equal innocents, or thuggish and warlike. Civilization, we are told, could be achieved only by sacrificing those original freedoms or, alternatively, by taming our baser instincts. David Graeber and David Wengrow show how

such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals. Revisiting this encounter has startling implications for how we make sense of human history today, including the origins of farming, property, cities, democracy, slavery, and civilization itself. Drawing on pathbreaking research in archaeology and anthropology, the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there. If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter-gatherers, what were they doing all that time? If agriculture, and cities, did not mean a plunge into hierarchy and domination, then what kinds of social and economic organization did they lead to? The answers are often unexpected, and suggest that the course of human history may be less set in stone, and more full of playful, hopeful possibilities, than we tend to assume. The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom, new ways of organizing society. This is a monumental book of formidable intellectual range,

animated by curiosity, moral vision, and a faith in the power of direct action. Includes Black-and-White Illustrations

### **Once a Jock... Always a Jock!!**

### **Recollections of the Flying Midshipmen**

*CreateSpace*

Definition: Jock n. (informal): A pilot or astronaut, an abbreviation of jockey as in throttle jockey or jet jockey. "Once a Jock . . . Always a Jock" is a compilation of three

hundred stories written by the first postwar generation of Naval Aviators who began their training in late 1945 as teenagers fresh out of high school. A 16 week Pre-Flight school started the clock running on a two year contract where each future Navy pilot held the rank of Aviation Midshipman, USN. The clock was still running when they earned their gold wings and were assigned to fleet squadrons. These Flying Midshipmen flew every aircraft in the Navy's arsenal. Eventually they were sworn in as commissioned officers and went on to participate in every major aviation event from the Berlin Airlift, the Korean War, and the Cold War to the

conflict in Vietnam. Readers of these stories will discover what motivated 3,000 high school kids to fly for the Navy. They will learn what it was like to be a Flying Midshipman at the bottom of the pecking order aboard ship or as a pilot in an aircraft squadron. Today's young pilots will gain some useful knowledge about training mishaps and accidents that could have been avoided. They will be thrilled by accounts of My First Corsair Flight or My First Jet Flight or My First Cat Shot. They might reflect on the sobering story of Jesse Brown, the African American who broke the color barrier in Naval Aviation the same year that Jackie Robinson broke the color barrier in major

league baseball. Those who have flown as civilian or military pilots will find themselves in the narrow escapes and the humor in the aftermath of bad judgment, and above all, in their great love of flying. They will learn what it is like to land a battle damaged fighter on an aircraft carrier in bad weather or how a pilot blinded by enemy flak was guided by his friend to successful wheels-up landing. Reading these stories, veteran flyers may remember the long monotonous anti-submarine and maritime patrols that ended in moments of stark terror. Anyone who never sat in the left seat of a flying boat may be surprised to know that seaplane pilots had to

supplement their flying skills with a firm knowledge of seamanship. They can read about it in Chapter 16, Flying Boat Jocks. Of course the book has stories for helicopter jocks and transport pilots and instrument pilots and flying in all kinds of climate from the arctic to the tropics. For the poetry minded, there are some of those too. These stories should appeal to anyone who has ever dreamed about flying. And most important, 100% of the proceeds from sales of the book will be directed to the Flying Midshipmen Endowment Fund for support of the Youth Aviation Training Program aboard the USS Midway Museum in San Diego.

## **The Very Last Seat on the Plane Createspace**

*Independent Publishing  
Platform*

Less than twelve hours before take-off, after her brother called from far-off California, her place of original derivation, Gwendolyn booked a flight on Southwest Airlines, the only coterie of the aerial velocity where she was able to muster up a ticket for this kind of urgency. Urgency, because you see, Gwendolyn's Dad of forty odd years had just suffered a massive heart attack, declared legally dead for approximately one half hour, and through the fortune or misfortune of modern technology, first responders were able to bring him back to life, from a legal perspective only, the

second Friday in June 2016 between the hours of 10:20 and 10:50 a.m. By the time Gwendolyn received news of this, it was Monday, and she could not have been in a higher geographical location in Montana, on a National Bison Range, no less, crowded by snow covered mountain peaks. Returned home she did to Florida, on Tuesday. She booked a flight Wednesday night for Thursday before sunrise, arriving in Los Angeles at 9:50 a.m. Not knowing what to expect, and hoping for the best, yet in her heart, she knew... She knew she would be visiting her dad on his deathbed, and more than likely assisting in the advising of "pulling the plug," from life support. From Tampa

to Las Vegas was tough: Flying out of tropical depressions always are. Yet, from Las Vegas to Los Angeles proved to be the last thing Gwendolyn had expected, as she seized the last seat on the plane in the very first row, left side, middle seat, between an old man in the aisle, and the window seat already inherited by a man, who was quite attractive, with model-type healthy hair, the darkest blue eyes she had ever seen, in his thirties, painfully fit, and although she found out later around the baggage belt, about 6'7" in height, who preoccupied his time by reviewing the Wisconsin volleyball athletes he coached on his portable electronic tablet. "Is this seat

taken?" Gwendolyn asked both men, to her immediate left, referring to the seat in between them, yet more directed toward the man by the window.

### **That College Book**

#### **Everything Nobody Told Us about Life After High School** *Createspace*

*Independent Publishing Platform*

In high school, everyone's talking about college. What to do. Where to go. Why it's important. Classes are given on it. Books are written about it. But details get left out. Every year, college graduates learn this the hard way as they step into adulthood. I was one of them. After earning a four-year degree, I went through two of the worst years of my life. Not that my

situation is unique. I am a part of a generation that was told to go to college first and sort out the details later. Most of us did. We chased the promise of a big shiny future, and we ended up being chased by the mistakes of our past. That's not to say we completely regretted going. This book isn't a list of privileged millennial complaints. It's a collection of wisdom gained in less than pleasant ways. It's a story of hardship, failure, victory, and perseverance. It's all of the things we wish someone had told us. And it takes place before college, in college, after college, and without college. This is the wild, painful, awkward, hilarious, depressing, & beautiful journey from youth to

maturity. This is the college book that no one ever gave us.

## **Life with the Suicide Disease**

### **The Story of Rodney**

## **Mann** *Createspace Independent Publishing Platform*

"You couldn't make it  
 through all 24 hours of  
 my best day." There  
 are a few different  
 medical names for  
 what he's got, but  
 everybody that has it  
 knows it as the Suicide  
 Disease. When I first  
 met him, he was  
 running out of reasons  
 to call it anything else.  
 For the next seven  
 months, we talked, and  
 wrote this. Rodney  
 seemed to have  
 everything: he had  
 been a Navy SEAL; he  
 had a six figure job as  
 the General Manager of  
 a prestigious  
 restaurant; and he had  
 Jenn, his beautiful  
 fiancée. Little did he  
 know that one fall, one  
 simple fall, would  
 change his entire life.  
 Everything good was  
 about to disappear.

This is the real life story of a remarkable man who suffers daily with the unbearable pain of Complex Regional Pain Syndrome. Meet Rodney Mann."

### **Amelia Earhart's Final Flight**

#### **On Amelia Earhart's Final Flight She Landed on Mili Atoll and Was Captured by the Japanese.**

The Versailles Treaty after WWI "Mandated Islands" in the Pacific to the Japanese. President Roosevelt felt the Japanese were illegally installing military fortification on these "Mandated Islands" which was in direct violation of the

WWI Treaty. Amelia Earhart, a popular female pilot who set many aviation records, wanted to increase her popularity by flying around-the-world. This would be a huge accomplishment that no pilot, man or woman, had attempted before. She left California, March 17, 1937, in a twin-engine Lockheed Electra and flew to Honolulu on the first leg of her historic flight with Fred Noonan and Harry Manning as her navigators. Unfortunately, she crashed on take-off and her Electra was so badly damaged, it had to be shipped back to the Lockheed plant in California for repairs. Amelia and her publisher husband, George Putnam didn't have the money to repair her Electra and

make another attempt to fly around-the-world, so Mr. Putnam approached President Roosevelt and asked if the U.S. government could help? FDR had met Amelia previously and knew of her plans to fly around-the-world. In 1937, FDR believed the Japanese were illegally preparing for war on "Mandated" islands in the Pacific. Marine Colonel Earl Ellis tried to sneak into Truk Atoll to gather information, but was caught on the island of Palau and killed. FDR believed that maybe a civilian pilot who was going to fly around-the-world might have a better chance to obtain the information he needed, so agreed to help Amelia on her request. But, FDR only did so, if Amelia would agree to take a few

pictures of Japanese island fortifications along the way. Although a staunch 'pacifist' Amelia agreed to the president's stipulations. The U.S. government helped plan her second attempt, provided her plane with larger engines, installed additional fuel tanks and reconnaissance cameras, but did so with little fanfare or publicity. Instead of flying from East to West as she planned on her first attempt, she flew West to East with only Fred Noonan as her navigator. Prior to her flight it's reported she was sworn into the Army Air Force as an officer and confided to a friend, "Imagine me being a spy!" Amelia left California on May 21st and headed for Miami,

Puerto Rico, Brazil, Africa, India, Bangkok, Singapore and Dutch East Indies, where Mr. F.O. Furman, a Lockheed maintenance specialist, met Amelia and checked her Electra and cameras for 3-days. At each stop, 55-gallon drums of fuel would be waiting for her, even if she flew into a field that was not on her announced itinerary. She and Fred Noonan left Lae, New Guinea on July 1st, 1937 and headed for Howland Island, 2,556 miles away. The Coast Guard Cutter ITASCA waited just off Howland to handle all communications as she approached. Unfortunately, when Harry Manning was the designated navigator on her first attempt, he arranged for Navy

ships to communicate with her in Morse Code. No one told the Navy vessels that Manning was no longer her navigator. Neither Amelia or Fred could read Morse Code! Amelia Earhart's Final Flight tells the story of how she crashed on Mili Atoll in the Marshall Islands, was captured by the Japanese, taken to Saipan where she was held in prison for several years before being killed. Eyewitnesses in the Marshall Islands and on Saipan provided the true accounts of what actually happened to Amelia on her historic flight, what happened when she was captured, how she was killed and reaction by U.S. and Japanese leaders. It also relates how U.S. Marines found

Amelia's briefcase and also found her Electra on Saipan when they attacked in 1944. David O'Malley, a member of the Writers Guild, wrote an interesting screenplay that's based on these eye-witness reports. It gives a rational explanation why both the U.S. and Japan have kept Amelia's capture and death a secrete since her Final Flight.

### **The Really Useful #edtechbook**

*CreateSpace*

Technology has invaded our working and recreational lives to an extent that few envisaged 20 or 30 years ago. We'd be fools to avoid the developments in personal, mobile, and wearable technology. Even if we tried we'd

still have to deal with other developments and distractions in classroom and learning technology like smart boards, blogs, video, games, students-led learning, virtual learning environments, social media, etc. More than this, however, is how the advances in technology, the economic and physical miniaturisation of computing devices, have impacted education: the students, the teachers, the classrooms, the spaces, the connections, the aspirations, etc. 'The Really Useful #EdTechBook' is about experiences, reflections, hopes, passions, expectations, and professionalism of those working with, in, and for the use of technology in

education. Not only is it an insight into how, or why, we work with these technologies, it's about how we as learning professionals got to where we are and how we go forward with our own development. In this book respected individuals from different education sectors write about many aspects of learning technology; from Higher Education (Sue Beckingham, Peter Reed, Dr David Walker, Sheila MacNeil, Terese Bird, Wayne Barry, Inge de Waard, and Sharon Flynn), Further Education (Rachel Challen), to Museums (Zak Mensah), workplace learning (Julian Stodd, Julie Wedgwood, and Lesley Price) and primary schools / early years education (Mike McSharry). With a foreword written by Catherine Cronin, from the National University Ireland, Galway, the breadth and depth of the experiences here are second to none. The knowledge these leading learning practitioners, researchers, and professionals, share, under the same cover, is a unique opportunity for you to read about the variety of approaches to learning technology, the different perspectives on the same technology, and how technology is impacting our culture and learning infrastructure, from early-age classrooms to leading research Universities and from museums and workplace learning providers. It is about

our passion for our work and our desire to make our work better through our own learning and development.

It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management
