Lives in Time and Place and Invitation to the Life Course

The Problems and Promises of Developmental Science *Routledge*

Invitation to the Life Course: Toward New Understandings of Later Life discusses in depth the challenges of age, time, and social contexts for the study of aging and later life. Understanding aging (as a process) and later life (as a period) must be accompanied by serious attention to the life course. This brings significant challenges related to time, as gerontologists must describe and explain life patterns over many decades. It also brings significant challenges related to place, as gerontologists must examine how social contexts structure pathways into and through later life, and how those contexts affect the nature and meaning of experiences along the way. This book is a natural extension of the editor's previous work, ""Lives in Time and Place: The Problems and Promises of Developmental Science"" (Baywood, 1999).

Invitation to Psychology *Academic Press*

Invitation to Psychology provides an introduction to fundamental concepts in psychology. It seeks to address the need of both teachers and students by offering two different kinds of chapters. The first variety covers the basic data and research within each of the traditional areas of psychology. In these "basic" chapters, the authors provide up-to-date and complete coverage of important developments in each area. The second type of chapter is innovative. These "exploring" chapters examine some of the practical applications and implications of the findings discussed in the basic chapters. These describe how basic psychological data are being used in the outside world, and discuss ongoing, often controversial explorations into some frontier areas of psychology. In other words, information about explorations and applications that is often scattered through the pages of other texts is brought together into systematic chapters in this text. The dual-chapter approach helps resolve the dilemma of differing expectations of teachers and students. Key topics covered include the definition of psychology; the psychological basis of behavior; sensation and perception; states of awareness; learning, memory, and cognition; motivation and emotion; abnormal psychology and social behavior.

Let's Talk about Death (over Dinner)

An Invitation and Guide to Life's Most Important Conversation *Da Capo Lifelong Books*

For readers of Being Mortal and When Breath Becomes Air, the acclaimed founder of Death over Dinner offers a practical, inspiring guide to life's most difficult yet important conversation. Of the many critical conversations we will all have throughout our lifetime, few are as important as the ones discussing death—and not just the practical considerations, such as DNRs and wills, but what we fear, what we hope, and how we want to be remembered. Yet few of these conversations are actually happening. Inspired by his experience with his own father and countless stories from others who regret not having these conversations, Michael Hebb cofounded Death Over Dinner—an organization that encourages people to pull up a chair,

break bread, and really talk about the one thing we all have in common. Death Over Dinner has been one of the most effective end-of-life awareness campaigns to date; in just three years, it has provided the framework and inspiration for more than a hundred thousand dinners focused on having these end-of-life conversations. As Arianna Huffington said, "We are such a fast-food culture, I love the idea of making the dinner last for hours. These are the conversations that will help us to evolve." Let's Talk About Death (over Dinner) offers keen practical advice on how to have these same conversations—not just at the dinner table, but anywhere. There's no one right way to talk about death, but Hebb shares time—and dinner—tested prompts to use as conversation starters, ranging from the spiritual to the practical, from analytical to downright funny and surprising. By transforming the most difficult conversations into an opportunity, they become celebratory and meaningful—ways that not only can change the way we die, but the way we live.

U.S. Health in International Perspective

Shorter Lives, Poorer Health *National Academies Press*

The United States is among the wealthiest nations in the world, but it is far from the healthiest. Although life expectancy and survival rates in the United States have improved dramatically over the past century, Americans live shorter lives and experience more injuries and illnesses than people in other high-income countries. The U.S. health disadvantage cannot be attributed solely to the adverse health status of racial or ethnic minorities or poor people: even highly advantaged Americans are in worse health than their counterparts in other, "peer" countries. In light of the new and growing evidence about the U.S. health disadvantage, the National Institutes of Health asked the National Research Council (NRC) and the Institute of Medicine (IOM) to convene a panel of experts to study the issue. The Panel on Understanding Cross-National Health Differences Among High-Income Countries examined whether the U.S. health disadvantage exists across the life span, considered potential explanations, and assessed the larger implications of the findings. U.S. Health in International Perspective presents detailed evidence on the issue, explores the possible explanations for the shorter and less healthy lives of Americans than those of people in comparable countries, and recommends actions by both government and nongovernment agencies and organizations to address the U.S. health disadvantage.

Grandmothering

Building Strong Ties with Every Generation *Rowman & Littlefield Publishers*

Contemporary grandmothers are often marginalized from extended family life because social institutions and grandmothers themselves do not understand that they could be vital for working parents, for overactive children, for suicidal youth, indeed for many of the problems of modern grandchildren. The genetics and hormones of older women have designed them to be vital family members, with patience and perspective that come with age and experience. In addition, biology helps directly via menopause. The grandmother hypothesis explains that human women, unlike almost any other living creature, experience decades of life after menopause, in order to make grandmothers available to their descendants. Here, Kathleen Berger explores he role of grandmothers in the lives of their grandchildren. She uses real life examples to illustrate how grandmothers can best integrate themselves into the lives of their children's families without overstepping. She explores the particular needs of each stage of childhood as they relate to grandmother involvement and input. Before a child is born, grandmothers need to attend to building a strong relationship with the future parents. In infancy, attachment and feeding are crucial. In early childhood, grandmothers need to follow the parent's lead, remembering that a parental alliance is essential. In childhood, children need to be safe but not isolated, and both bullies and victims benefit from a grandmother's support and assistance. In adolescence and emerging adulthood, grandmothers need to build direct connections and not avoid the difficult topics of

sex, drugs, death, disease, and money. Throughout, elders need to learn technology, insuring that it fosters, not impedes relationships. Problems in relationships are explained honestly and with insight. Among these are issues when three generations share a home, when parents get divorced, and when grandchildren rebel against parental authority. Throughout the work, both the joy and the complications of effective grandmothering are described. Whether you're a biological grandmother, a trusted step-grandmother, or just a warm and trusted older woman with young ones in your life, you can be a vital force in the lives of future generations.

The Life Span

Human Development for Helping Professionals *Pearson College Division*

The Life Span: Human Development for Helping Professionals, 4/e, provides an in-depth look at the science of human development, highlighting theories and research that have useful applications for individuals working in fields such as education, counseling, and social work. The main purpose of this book is to provide the reader with information that can be translated into professional “best practice” applications. Throughout, the text reflects the contemporary view that life span development is a process deeply embedded within and inseparable from the context of family, social network, and culture. Because the book is designed for graduate students, most topics, especially those that have special relevance to helping professionals, are covered in greater depth than in a typical life span text. The expanded coverage of research in these areas will enhance students' understanding of the scientific basis for application to practice. From reviews of the book: “This book is unique in that it is research-based, includes comprehensive coverage of important course topics, and offers helping professionals information about human development that will enhance service provision to clients across the lifespan.” --Mary M. Chittooran, Saint Louis University “The writing style is clear, interesting and engaging and is at a level appropriate for my students. Nicely done. . . . [The] case studies [and] developmental psychopathology sections are strengths. . . . [The book is] well organized, well-written, broad-based . . . , [and] insightful. [I] especially liked the authors' focus on practical and applied therapies, as well as their emphasis on research-based therapies that incorporate sound principles of human developmental.” --Rosalie A. Rohm, Ball State University “This readable, well organized text addresses the depth and scope of development. The text extends students knowledge of the material by providing a wealth of applicable information for those who are or will be in a helping profession. . . . [Compared to other available texts, this one is] far superior in terms of the balance of scope and depth.” --Kathryn Cooper, Northern Colorado University New Interactive, Multimedia Learning Features in the Video-Enhanced Pearson eText: o See real examples. Embedded videos illustrate and explain key concepts and show individuals addressing the

challenges of that period of the life span. (See pages 334, 342, and 353 for examples.) o Practice applying chapter content. The Practice Using What You've Learned feature includes scaffolded video and print case exercises that challenge readers to analyze and apply chapter content. Sample responses are available through the enhanced text. (See page 366 for examples.) See how to work with people at different stages of the lifespan. Applications sections blend empirically supported information about treatments with the issues covered in each chapter, offering extensive discussion of how developmental science can inform practice. These include topics such as adolescent health and well-being, new approaches to maternity care, new interventions for promoting secure infant attachments, encouraging learning through play, helping parents avoid corporal punishment, and mindfulness-based practices, among many others. (See 357-360 for an example.)

The Lifespan of a Fact

Now a Broadway Play *Hachette UK*

NOW A BROADWAY PLAY STARRING DANIEL RADCLIFFE 'Provocative, maddening and compulsively readable' Maggie Nelson In 2003, American essayist John D'Agata wrote a piece for Harper's about Las Vegas's alarmingly high suicide rate, after a sixteen-year-old boy had thrown himself from the top of the Stratosphere Tower. The article he delivered, 'What Happens There', was rejected by the magazine for inaccuracies. But it was soon picked up by another, who assigned it a fact checker: their fresh-faced intern, and recent Harvard graduate, Jim Fingal. What resulted from that assignment, and beyond the essay's eventual publication in the magazine, was seven years of arguments, negotiations, and revisions as D'Agata and Fingal struggled to navigate the boundaries of literary nonfiction. This book includes an early draft of D'Agata's essay, along with D'Agata and Fingal's extensive discussion around the text. The Lifespan of a Fact is a brilliant and eye-opening meditation on the relationship between 'truth' and 'accuracy', and a penetrating conversation about whether it is appropriate for a writer to substitute one for the other.
