Scripting in Java: Integrating with Groovy and JavaScript ...

Typically, but not necessarily, a script engine is an implementation of an interpreter for a scripting language. Interpreters for several scripting languages have been implemented in Java. They expose programming interfaces so a Java program may interact with them.” — Kishori Sharan, Scripting in Java: Integrating with Groovy and JavaScript

Scripting in Java Quotes by Kishori Sharan

beforeOpen - A script that executes before BIRT opens the data source connection for data access. If you are building a Scripted Data Source, two additional events are available: Open - A script that executes to open the Data Source. Close - A script that executes to close the Data Source.

Integrating BIRT - eclipse.org/birt/

By embedding scripts in your Java code, you can customize and extend the Java application. For example, you can have configuration parameters, business logic, math expressions, and other external parts written as scripts. When developing your Java application, you do not need to choose the scripting language. If you write your application with the Java Scripting API (defined by JSR 223), then users can write scripts in any language compliant with JSR 223. See The Java Scripting API.
