Electrical Machines Questions and Answers -

Sanfoundry

Answer: The mechanical loss and open circuit core loss combined together are caused by rotor rotation. Their sum is called as no-load rotational losses. Q.4.

What constitute mechanical loss and open circuit core loss?

Answer: Mechanical loss – This loss consists of bearing friction, brush friction and windage losses. The windage or wind friction loss includes the power required to circulate air through the machine and ventilating ducts and is approximately proportional to square of the speed.
