$P(x) \& (\forall y,z. P(y) \& P(z) \Rightarrow y = z)$ which means that there is some x satisfying the property $P(x)$ and also that if any y,z both satisfy the property they are equal. This expresses that there exists a unique x satisfying $P(x)$. Occasionally, and largely for abbreviation, we will write e.g., $X =$.

Lecture Notes on Discrete Mathematics

Discrete mathematics is the study of mathematical structures that are fundamentally discrete rather than continuous. In contrast to real numbers that have the property of varying "smoothly", the objects studied in discrete mathematics – such as integers, graphs, and statements in logic – do not vary smoothly in this way, but have distinct, separated values.

6.1 Set Theory: Definitions and the Element Method of Proof Recall that a set is a collection of elements. Some examples of sets of numbers are: $\mathbb{Z} = \{ \dots; -2; -1; 0; 1; 2; \dots \}$ is the set of integers. $\mathbb{R}$ is the set of all real numbers. $\mathbb{Q} = \{ \frac{p}{q} \mid p, q \in \mathbb{Z} \text{ with } q \neq 0 \}$ and $\mathbb{M} = \{ \frac{p}{q} \}$ is the set of rational numbers.

Sets and set operations

Set Theory Set Theory A set is an unordered collection of different elements. A set can be written explicitly by listing its elements using set bracket. If the order of the elements is changed or any element of a set is repeated, it does not make any changes in the set.

Sets in Discrete Mathematics - SlideShare

This text aims to give an introduction to select topics in discrete mathematics at a level appropriate for first or second year undergraduate mathematics majors, especially those who intend to teach middle and high school mathematics. The book began as a set of notes for the Discrete Mathematics course at the University of Northern Colorado.

If a set has an infinite number of elements, its cardinality is ∞ . Example – $|\{1, 4, 3, 5\}| = 4, |\{1, 2, 3, 4, 5, \dots\}| = \infty$. If there are two sets X and Y , $|X| = |Y|$ denotes two sets X and Y having same cardinality. It occurs when the number of elements in X is exactly equal to the number of elements in Y .
